

## **Updated COVID-19 Positive Cases and Exposure Information**

### **Persons Who are Exposed to Someone with COVID-19**

The following groups do not need to quarantine if they are asymptomatic:

- Boosted; or
- Vaccinated, but not yet booster-eligible individuals as long as they are asymptomatic; and
- Not living in the same household as the Positive Case.

Following exposure, individuals must:

- Test on day 5 (PCR)
- Wear a well-fitting mask around others for 10 days in both indoor and outdoor environments

If at any time in the 10 days following your exposure symptoms develop or you test positive, stay home and notify the office immediately.

### **Isolation for Persons Who Test Positive for COVID-19**

Everyone, regardless of vaccination status, previous infection, or lack of symptoms will undergo isolation when testing positive for COVID-19.

Isolation can end on day 6 if:

- Symptoms are not present or are resolving and a negative PCR test result has been collected on day 5 or later
- A well-fitting mask is worn around others for a total of 10 days in both outdoor and indoor environments

If unable to test or choosing not to test, isolation can end after day 10.

### **Quarantine for Persons Who are Exposed to Someone with COVID-19**

The following groups will undergo a 5 day minimum quarantine when exposed to a COVID-19 positive individual:

- Vaccinated and booster-eligible but have not yet received their booster dose; or
- Unvaccinated; or
- Living in the same household as the positive case regardless of vaccination status.

Quarantine can end on day 6 if:

- Symptoms are not present or are resolving; and
- The individual provides a negative PCR test result collected on day 5 or later
- A well-fitting mask is worn around others for a total of 10 days in both outdoor and indoor environments

If unable to test or choosing not to test, isolation can end after day 10. If at any time during your quarantine symptoms develop or you test positive, stay home and notify the office immediately.
